A detailed record of the birth of the nation
The American State Papers, originally republished in the second quarter of the 19th century, is a retrospective collection of largely Congressional, but also Executive, materials originating from 1789 through 1838. Readex’s digital American State Papers illuminates key moments in early American history as they occurred and influential decisions as they were made. This collection covers such historical events as Lewis and Clark’s Expedition, Burr’s Conspiracy and Arrest, the Treaty of the Creek Indians made by Andrew Jackson and much more.

American State Papers also includes speeches and messages of Presidents Washington, Adams, Jefferson and Madison. Other documents address battles with the Seminole Indians, the capture of the British Fleet on Lake Champlain, depredations committed by Mounted Riflemen, exploration of the Pacific Ocean, free negroes in North Carolina, land for female academies, protection of the western frontier, trade with China and myriad other fascinating topics.
